Ramadan is observed by Muslims worldwide as a month of fasting, prayer, reflection and community. This year, it begins on April 23rd and ends on May 23rd. During Ramadan, one must fast every day from dawn to sunset. The last day of Ramadan is called Eid al-Fitr and Muslims around the world celebrate it with their families and communities. In this activity, you will make a DIY calendar that counts down the days from the start of Ramadan to the end, and receive a sweet treat in the process!

1. Gather Supplies:
   - Small Candies or Treats
   - Cardboard Rolls (toilet/paper towel) or Small Cups
   - Tissue or Construction Paper
   - Tape or Glue / Hot Glue
   - Cardboard Box
   - Markers
   - Scissors
   - String

2. Cut your cardboard rolls into 30 equal segments, large enough to fit a small treat. If you do not have enough cardboard rolls, use small plastic or paper cups. Or a combination of both!
3. Cut a base for your calendar out of cardboard.

4. Decorate your base and cups/rolls however you like! You can paint them, color them with markers, or leave them as is.

5. Glue your cups/rolls down in whatever design you like so that an open end is facing upwards.

6. Cut out 30 circles of tissue or construction paper large enough to cover the front end of your cups/rolls and label them 1-30 with your marker.

Note: Parents may need to help with this step if the cardboard is too thick.

Note: Hot glue works best for this step!
Place a small treat in each cup/roll, cover each one with a cut-out circle, and secure them with glue or tape.

Decorate your calendar with any additional supplies you have to create a nice design.

Add string to hang it up on a wall or window.

Now you have a sweet treat to look forward to each day of Ramadan to break open once the sun has set!
