GLOW-IN-THE-DARK FACE PAINT

Make your very own homemade glow-in-the-dark face paint, then use it to paint your face and body! When you’re done, turn off all the lights and use a black light to see your creation. The heavier the paint is applied, the more it will glow!

1. Gather Supplies:
   - 4 Tablespoons Cornstarch or Talcum Powder
   - 2 Tablespoons Cold Cream or Thick Lotion
   - 1 Yellow Highlighter
   - Food Coloring
   - Bowl or Container

2. Break open the highlighter and place the inside of the marker into a cup of water. You will need 2 tablespoons of highlighter infused water. Then set aside.
Add 2 tablespoons of cold cream or thick lotion to a bowl or container.

Add 4 tablespoons of cornstarch or talcum powder into the container.

Add a couple drops of your favorite food coloring color to the container.

Add 2 tablespoons of your highlighter infused water to the container.
Mix all the ingredients and add a little more cornstarch if it’s too watery. Be careful because it can get thick really fast.

Now you have your very own homemade face paint! Paint away!
