

# Spider Web Slime

Slime is a favorite to play and experiment with. Try to “spookify” your slime for Halloween with just a little something extra, and by the end you’ll have very webby-looking slime!

# 1

### Gather materials:

- ½ cup Glue
- ½ tablespoon Baking Soda
- 1 teaspoon Contact Solution
- 2-3 teaspoons Instant Snow
- Spoon / Popsicle Stick
- Plastic Spider
- Bowl

# 2

Take ½ cup of glue and pour it in a bowl.

**SPONSORED BY**

3

Add ½ tablespoon of baking soda to the glue, and mix with a popsicle stick or spoon.

4

Add 1 teaspoon of contact solution to your mixture.

5

Mix it together until it starts to ball up.

6

Add 2 teaspoons of instant snow, and mix into your slime. If you want more of a stringy look, add another teaspoon of instant snow.

# 7

Take out your slime and knead for a few minutes. Stretch it out and work it. If it is too hard, you may need more contact solution (very little). If it is too sticky, add more baking soda.

# 8

Add a plastic spider or two if you'd like, and play with your slime!
